# MOVA-fix

## New parting compound in PASCHAL quality

PASCHAL is expanding its product portfolio with a new, solvent-free parting compound for precast, in-situ concrete and civil engineering construction. This means that PASCHAL not only makes forming in the system possible, but also dismantling in the system. MOVA-fix is available exclusively from PASCHAL.

The PASCHAL release agent MOVA-fix consists of renewable raw materials and can be used for all formwork systems. It is a solvent-free concrete release agent emulsion and is suitable for both absorbent and non-absorbent formwork.

Take the opportunity now and secure MOVA-fix!

Ready-to-use  
parting compound

Available in  
a practical 5 litre  
test canister

Solvent-free

Economical consumption

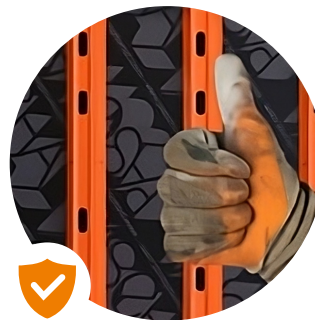

For further information, just get in touch with us by phone on +49 7832 71-0, send us an e-mail to [service@paschal.com](mailto:service@paschal.com) or contact your formwork consultant.

### An overview of the advantages:

#### For demanding exposed concrete surfaces

Ideally suited for the production of clean, stain- and blowhole-free exposed concrete surfaces

#### Longer service life of your formwork

Also serves as corrosion protection for the formwork. It also protects the colour coating and plywood protected

#### Economical and effective

Thanks to its low viscosity, MOVA-fix ensures economical consumption

- 20 litre canister
- Ready-to-use parting compound
- GISBAU: GISCODE BTM 05 | Water hazard class: WGK 1
- Easier removal of the formwork from the concrete
- Suitable for all absorbent and non-absorbent surfaces
